

Increasing Patient Access Through Transportation

THE CHALLENGE:

Patients commonly miss critical health visits just because they do not have access to a car or a ride.

Each missed visit puts these patients at risk to become seriously ill.

THE SOLUTION:

A volunteer driver program that connects CVIM drivers with patients who need rides to medical appointments at Community Volunteers in Medicine.

This includes patients who would otherwise miss out on important visits to community medical centers and testing at area hospitals.

Volunteer- Assisted Rides

SAFE & EASY

Convenient online system with mobile app

Drivers covered by supplemental insurance

Patients are pre-selected by clinic staff
